FEDERATED STORES
ELBA, ALABAMA

Smokey Says:

COUNTIES THAT HAVE PROTECTED THEIR WOODS HAVE MORE WOODS FOR THE FUTURE.

Burned woodlands furnish no timber to build new homes. America must look to protected forests for lumber. To supply building material for future needs, our forests must be protected from fire.

CARD OF THANKS

We wish to extend our thanks to those who were so kind and helpful during the long illness and death of our wife and mother, Mrs. E. L. O'Neal. May God bless each one, is our prayer.
E. L. O'Neal,
Kathleen O'Neal.

Friends of Fred M. Harper will be glad to know that he is and has been after a minor operation at Enterprise hospital and returned to his home Tuesday.

Mrs. E. G. Bragg and son, Wyatt, spent the week end in Birmingham, guests of Mr. and Mrs. D. B. Bragg.

REGISTER'S NOTICE OF SALE OF LANDS

Under and by virtue of a decree of sale of the Circuit Court of Coffee County, Alabama, in Equity, Elba Division, rendered on March 5, 1946, ordering the sale of certain lands for division among joint owners, in the cause styled Mrs. Modie Tindol, et al., complainants, vs. Roy Tindol, Respondent; and under and by virtue of the decree of said Court rendered on April 2, 1946, disaffirming the sale made by the Register of said Court of said lands on March 25, 1946, and ordering another sale of the said lands under the terms, conditions and directions as provided in the former decree of March 5, 1946, I, as Register of said Court, will sell at public auction to the highest bidder, for cash, in front of the Court House of Coffee County, Alabama, within the legal hours of sale, on the 29th day of April, 1946, the lands hereinafter described, free from all incumbrances except the 1946 taxes, and said lands to be sold in lots as follows: Tract No. 1: 4 3/4 acres in N. E. Corner of SW 1/4 of Section 13, 70-100 acres on the North side of NE 1/4 of SW 1/4, and 36 55-100 acres, being all of SW 1/4 of NE 1/4, less amount deeded to Mrs. Foot; and all in Section 13, Township 6, Range 22, and 5 acres, more or less, designated as Tract No. 2. W 1/2 of NW 1/4, and NE 1/4 of NW 1/4, of Section 18; SW 1/4 of SW 1/4, and S 1/2 of SE 1/4 of SW 1/4, of Section 7, all in Township 6, Range 22; and NE 1/4 of NE 1/4 and 5 acres, more or less, in N. E. Corner of SE 1/4 of NE 1/4 of Section 13; and S 1/2 of SE 1/4 of SW 1/4, and S 1/2 of NE 1/4 of SW 1/4, and S 1/2 of SE 1/4 of SW 1/4, of Section 12, all in Township 6, Range 22, containing in all 535 acres, more or less, and designated as Tract No. 3. All of said two tracts lying in Coffee County, Alabama. Said two tracts contain in the aggregate 479 acres, more or less. Said lands being known as the S. H. Tindol, deceased, lands, and said sale being made for the purpose of division among joint owners and tenants in common and dower of Mrs. Modie Tindol. This April 9, 1946.
GLADYS CLARK, Register.

All-25.

Mrs. E. H. Ward and daughter, Nellie Sue, of Elba, visited three days last week in Clearwater, Fla., guests of Mrs. W. K. Farris; his son-in-law, Mr. and Mrs. Gordon Addison. While there they visited with Mr. St. Petersburg and Tampa.

Mr. R. B. Borders is driving a bus from Elba to Andalusia.

Miss Peggy Blue, student at Alabama College, Montevallo, Ala., is spending a few days with her mother, Mrs. Minnie Blue, and family, Range 22, containing in all 535 acres, more or less, and designated as Tract No. 3. All of said two tracts lying in Coffee County, Alabama. Said two tracts contain in the aggregate 479 acres, more or less. Said lands being known as the S. H. Tindol, deceased, lands, and said sale being made for the purpose of division among joint owners and tenants in common and dower of Mrs. Modie Tindol. This April 9, 1946.

Fire Is Greatest Killer in Raids

Is Conclusion Reached by Board of Medical Men.

WASHINGTON. — Fire, not the exploding bomb, is the greatest air raid killer and the chief menace against which civilians must be protected if the country is to survive future wars.

That is the general conclusion reached by a special board of medical men and scientists after a survey of U. S. strategic bombing of Germany. Their report has just been made public.

They found that bombings in the Reich killed 600,000 civilians, wounded 700,000 and made 7,800,000 homeless. Deaths from actual bomb blasts, however, were relatively infrequent as only persons within 40 yards of an explosion were affected.

Fire was the real killer.

"Preliminary reports from Hiroshima and Nagasaki," the report added, "indicate that the number and type of injuries sustained in an atomic bomb attack do not differ greatly from those inflicted upon ordinary incendiary bombing."

The Germans called the raids on industrial cities "fire blitzards."

The fires created 30-mile-an-hour drafts which sucked and sucked many persons into the flames. Street temperatures were recorded up to 1,472 degrees.

Up to 80 per cent of air raid deaths in Germany were due to carbon monoxide poisoning which attacked victims in cellar shelters or trapped in wreckage. The gas came from shattered gas pipes and broken gas mains.

Breathing superheated air and direct burns caused many deaths. Many bodies were found shriveled from extreme dehydration, with no sign of other injury.

It was found that safest protection was provided by so-called formal shelters, building five to seven stories high with walls and floors one foot thick, and self-contained ventilation, heating, water and supplies.

The general added:

"There is not only the super-bomb which can carry atomic bombs and cruise about the globe, there are also the robot planes which will be able to perform the same spectacular flights, with a non-existing crew. And the damage that will be wrought by a robot directed V-2 weapon equipped with an atomic bomb is indeed a far too terrible thing to contemplate."

Against the possible use of such weapons by other nations, General Arnold said, the United States must have "a sure and certain defense."

"Our hope lies, then," he said, "in a policy of offensive readiness to perpetuate peace—to provide for national security."

Gun Collector Adds 35

With Assistance of Army

HUDSON, MICH.—A gun collector, a civilian life, Walter R. Avo, continued his hobby while serving with the 5th Infantry division in Austria.

He now has 35 guns of French, German and Belgian make, ranging from a three-inch, 18-caliber rifle to a .22-caliber pocket pistol.

While serving in Austria, Avo learned that civilians were being required to turn in all firearms in their possession.

He rushed to army headquarters and explained his gun collecting hobby. An officer told him to help himself.

Avo selected the 35 guns and recently had them registered at the police station in Austria. It kept of fees only half a day.

He declined to explain how he transported the guns to this country.

Allies Received More Vehicles Than We Did

BOSTON, MASS.—

Allied nations received more American tanks and trucks than the United States overseas forces, according to Col. H. B. Sheets, commander of the Boston ordnance district.

Sheets said that statistics showed that Russian, English and Chinese troops received 765,839 vehicles of all shapes and sizes, compared with 654,083 shipped to American supply depots abroad. He said Russia received 459,481, the United Kingdom 238,110 and China 28,348.

Nearly 2,000 American tanks were shipped to Britain on our own forces in the Pacific, Mediterranean and European theaters received, Sheets said.

Yanks Find It's Very Small Army After All

CHATTANOOGA, TENN.,

Fernando A. Braverman of Chattanooga entered the army in 1917, and at Ft. Leavenworth met Hiram W. Parkington of Columbia, S. C. They ran into each other again in Hawaii in 1918, next met in a Japanese prison camp on Formosa in 1944, were separated, both ultimately released and now find themselves full comrades together again at Moore General hospital.

FAMILY REUNION

A family reunion was held at the home of Mr. and Mrs. W. J. Smith on Sunday, April 7, honoring the return of their grandson, Noel Ellis, who has just returned from 27 months' service overseas. A large dinner was enjoyed by everyone present. It was served buffet style under the large trees in the front yard.

Those present were, Mr. and Mrs. W. J. Smith, Miss Vera Smith, Miss Thelma Smith, Mr. and Mrs. R. B. Borders, Mrs. William Borders, Mrs. Carl Russell and son, Robert, Miss Bea Borders, Mrs. Will Smith, Mr. J. L. Smith, Mrs. Willie B. Jackson, Mr. and Mrs. James Brooks and son, Lamar.

The afternoon was enjoyed by all present and hope to have another one soon. I hope we have the next one at the home of Mr. and Mrs. Dick Jackson.

Cold Regions
The North pole is not the coldest place in the Arctic circle, according to the Encyclopedia Britannica. For more than a quarter of a century Europeans have lived in the coldest Arctic regions, which are the Yukon basin in Alaska, the Yukon Territory in Canada and the Siberian province of Yakutia. Temperatures of 60 below zero have been recorded in Yakutia.

Seed Peanuts

We have on hand a supply of North Carolina Runner Seed Peanuts. These peanuts have been specially selected for planting seed and are good and sound.

You can buy them in any quantity you wish in the hull, or we will shell, treat and hand-pick them for you.

Come in today and let us have your order, while you are assured of good, clean seed.

DONALD COMER

Son of Late Governor B. B. Comer

For HANDY ELLIS

for Governor

Donald Comer

During the years that you have been my close neighbor, I have closely followed your career of public service as a member of both houses of legislature and as Lieutenant Governor of Alabama. I have been especially impressed with your outstanding service to the cause of education, which has always been so close to my own heart, and with your sincere interest in the problems of public health, public welfare and the farmers of our State, particularly the small farmers.

I am taking this opportunity to let you know that your candidacy for Governor has my unqualified endorsement and support. I am delighted to receive from many of our mutual friends the good news of the fine progress of your campaign. It is my hope that you will be elected by a substantial majority in the Democratic primary of May 7th.

I should my democratic of your candidacy be of any service to you, please feel free to let my stand be known.

With all good wishes,

Sincerely yours,

DONALD COMER

(Md. Pub. Adv. by Friends of Handy Ellis)

SGT. BRYAN, IN FAR EAST, WONDERS IF HE WILL GET TO COME HOME

Iri, Korea, Feb. 21, 1946
Dear Editor:
I am writing this letter in hopes that you will publish it in your newspaper to enlighten the people what is going on as far as getting men home. We are in the far east in Korea and we tell us that all men with 45 points are not eligible until June 30th.

We read about men in the States who were not able to fight because they were physically unable and also of men who were working in essential jobs. Why can't those men be sent to replace all of us men who spent many nights in muddy fox holes and were facing death. Some of us were wounded. Are we supposed to be treated like that or not? They said there were no ships. Well, now that there are ships, what do they say? No replacements. Where are the draft boards? Did they say that when we came in? No, the word was that we would report on a certain day. We are waiting to know if the people in the States are going to let this continue or not. If there is another war, will the people back there want any more or not? If there is not something done about the situation, there will be many men who got a rat deal this time and there will be a big day in their entrance. Our children will also be informed of this matter. Please do all you can to let the people back there know what the deal is over here where it seems that we are the forgotten men who risked our lives for the things we were hoping to return to.

Yours truly,
Sgt. James M. Bryan

PHIFFER-DYE WEDDING SOLEMNIZED APRIL 1ST

Two-5 Hubert W. Dye, son of Aene Dye, of Elba, and Miss Margaret Phiffer, of Birmingham, were married on April 1st at Post Chapel in Fort Benning, Ga. Chaplain Elliot S. Liden officiated before a gathering of close friends and relatives which included Mrs. Aaron Gibson, sister of the bride, as maid of honor, and Captain Samuel W. Foster, S-2, the Infantry School, brother-in-law of the groom, as best man. They will make their home in Columbus, Ga.—Continued.

REGISTER'S NOTICE OF SALE OF LANDS

Under and by virtue of a decree of sale of the Circuit Court of Coffee County, Alabama, in Equity, Elba Division, rendered on March 29, 1946, ordering the sale of certain lands for division among joint owners, in the cause styled Mrs. Modie Tindol, et al., complainants, vs. Roy Tindol, Respondent; and under and by virtue of the decree of said Court rendered on April 2, 1946, disaffirming the sale made by the Register of said Court of said lands on March 29, 1946, and ordering another sale of the said lands under the terms, conditions and directions as provided in the former decree of March 5, 1946: I, as Register of said Court, will sell at public auction to the highest bidder, for cash, in front of the Court House door of Coffee County, Alabama, in Elba, within legal hours of sale, on the 29th day of April, 1946, the lands hereinafter described, free from all incumbrances except the 1946 taxes, and said lands to be sold in two tracts numbered 1 and 2, as follows: Tract No. 1, 4 3/4 acres in N. E. Corner of SW 1/4 of NW 1/4 of Section 13, Township 6, Range 21, containing 65 acres, more or less, and known as the Homer Waters land. And all of the SE 1/4 of NE 1/4, less 5 acres, more or less, sold to Cole, and 30 acres on the North side of NE 1/4 of SE 1/4 of Section 13, Township 6, Range 21, containing 65 acres, more or less; said two above described parcels of land containing in the aggregate 124 acres, more or less, designated as Tract No. 1.

Tract No. 2, W 1/2 of NW 1/4, and NE 1/4 of NW 1/4, of Section 13, SW 1/4 of SW 1/4, and S 1/2 of SE 1/4 of SW 1/4, of Section 7, all in Township 6, Range 22; and NE 1/4 of NE 1/4 and S acres, more or less, in N. E. Corner of SE 1/4 of NE 1/4 of Section 13; and S 1/2 of SE 1/4 of SW 1/4 and 10 acres, more or less, in N. E. Corner of SE 1/4 of SW 1/4, and S 1/2 of SE 1/4 of Section 12; all in Township 6, Range 21, containing in all 355 acres, more or less, and designated as Tract No. 2. All of said two tracts lying in Coffee County, Alabama. Said two tracts contain in the aggregate 479 acres, more or less. Said lands being known as the S. H. Tindol, deceased, land, and said sale being made for the purpose of division among joint owners and tenants in common and dower of Mrs. Modie Tindol. This April 9, 1946.

Closed by choir singing 62. Prayer by Rev. A. W. Barker.

D. J. Dye, Chairman, U. B. Hudson, Secy.

Red Square

Red square in Moscow was long the place of public executions. It became the great trade center, a market place, and the heart of European Russia, to which came Russian merchants over the several roads that converged on Moscow, and by the river Moskva. The waters of this stream flow along one side of the Kremlin and reach the Volga through the Oka river.

Improved Uniform SUNDAY SCHOOL LESSON

Lesson for April 21

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

TWO FRIENDS TALK WITH CHRIST

LESSON TEXT—Luke 24:13-35, 25:31. **MEMORY SELECTION**—They said one to another, Did not our heart burn within us while he talked with us by the way, and while he opened to us the scriptures?—Luke 24:32.

Fellowship with the risen Jesus

Lord is the unfailing source of faith and courage. Such certainty is the very essence of our observance of Easter.

We declare with Paul, "Now is Christ risen from the dead" (1 Cor. 15:20), and that he is "declared to be the Son of God with power" by the resurrection from the dead" (Rom. 1:4). We would join the apostles who "with great power" (1 Cor. 2:4) "gave witness of the Lord Jesus" (Acts 4:33).

Come with us as we join two men who had loved and bewailed, who told that all their hopes had been crushed.

Let us join them as they walk wearily along the road from Jerusalem to Emmaus. Suddenly there is another light, another group. Let us listen to their conversation.

Something is obviously wrong. These two men are distressed and discouraged. They are men with...

Holly Sacred
The legends regarding the holly date back to the Druids, who believed the evergreen leaves of the holly were proof that the sun never deserted it and it was therefore sacred. Legend also says that the crown of thorns was composed of holly, and that before the crucifixion the berries were white, but turned crimson, like drops of blood, afterward.

COMMENCEMENT EXERCISES AT FAIRVIEW SCHOOL

The commencement ceremony will be held at Fairview Baptist Church on April 21 at 7:30 p. m.
Song by audience, Class March, Master of Ceremonies, T. W. Purcell. Song by Junior High School, Rev. J. T. Powell.
The graduating exercises will be held at Fairview School at 10:00 a. m. April 22. Class President, Max Bowdoin. Valedictorian, Donnie Donaldson. Class Poet, Lurline Daugherty. Class Will, Grafton Weeks. Giffonian, Agnes De-
vino. Hint To Our Fellow, Roba Henderson. Salutatorian, Thelma Holloway. Speaker, Professor E. C. Novins, of Kinston High School. Awarding of Diplomas, Professor T. W. Pierce.

Smoke Screens
The large-area smoke screens developed by the chemical warfare service were credited with playing an impressive part in the campaigns of Northern Africa, Europe, Sicily, Italy and various Pacific islands. These screens were set up by mobile mechanical oil smoke generators. The Axis beach was kept under a canopy of smoke all most continuously from the first landings until the final breakout and river crossings everywhere were made with much smaller losses than would have been possible without the smoke screens. At one time, smoke mixtures were being made that would give eight colors, red, orange, yellow, green, blue, violet, white and black.

Moisture-Proof Bag
If you use a moisture-proof bag to keep leafy vegetables fresh in the refrigerator, be sure to wash it well with warm water at least once a week.

Lactic Acid Used to

Quench Tank Fire

The mystery of the abnormal wartime rise in the production of lactic acid has been cleared by the disclosure that this chemical, which in peacetime enters into the manufacture of such essentials as leather, textiles, foods and liquors was used in a frequenting solution to prevent explosion and death in tank interiors.
Many tragedies had taken place inside of tanks when enemy shells pierced the armor and set fire to ammunition supplies. A number of remedies had been tried unsuccessfully until someone thought of the high surface activity and wetting properties of a solution of a lactic acid compound. In actual practice, the solution was jacketed around the tank's magazine, sides and bottom, as well as in the spaces between the shell racks.
An invading shell released the fire-breathing medium and even if the ammunition was set ablaze, the resulting fire could be quickly brought under control. In this manner a product normally used in the preparation of sauerkraut, pickles and essences made one of chemistry's valuable contributions to war. The first shipment of this material was made on October 30, 1944, three months after the manufacture had been ordered by the War Production Board.
The solution was used in the tank to work with the government on the problem.

Steel Plants Produce

Many Coal Chemicals

Methanals, sulfur dyes and automobile tires are only three of a long list of household and industrial goods made wholly or in part from chemicals produced in iron and steel plants. The chemicals are produced in steel plants during the process of producing coke to feed the giant blast furnaces which turn iron ore into molten iron.
Gases and volatile liquids driven from the coal during "coking" in coke ovens are recovered and refined, at least partially, right at the steel plants. In most instances the partially refined coal chemicals are then sold to chemical manufacturers for further processing, but some chemicals are produced in usable form by the steel industry itself.
During 1944, for example, coal chemical plants of steel companies yielded an estimated 50,000 tons of ammonium sulfate, an important source of nitrogen for commercial fertilizers.

Bustling City

Devastated many times by earthquakes, Tabriz, Iran, has within its sun-dried brick walls many ruins, the most conspicuous being that of a 600-year-old citadel. The Kabud Masjed (Blue Mosque) is renowned for its beautiful tile facades. The native quarter is a tangle of mud hovels and bazaars which line narrow, tortuous streets, some of which have been widened recently. Mules, horses, camels, porters and carts crowd one another for space. Drizzled women and men wearing "looking European" clothes mingle with Iranians and Afghans in native costume. In the foreign quarter, the houses are large and beautiful with lovely gardens surrounding them. Tabriz is an important center for the dried fruit and rug industries. Each year, rugs are exported in exchange for manufactured goods. Because of its industry Tabriz maintains a branch of the Imperial Bank of Iran and a local telephone service. A railroad connects Tabriz with the Soviet Caucasian station at Dzulfia in Armenia. There are many good highways.

Redfoot Lake

Tennessee's Redfoot Lake is the product of earthquakes that occurred in the winter of 1811-1812, says the National Geographic Society. Lying in a northwestern corner of the state, near the Mississippi river and close to the Kentucky line, the lake is about 10 miles long, about 5 miles wide. The shocks which remolded the face of the earth began on December 16, 1811, and continued in varying violence well into February of 1812. These tremors were noted in New Orleans, in Washington and in Boston. During the upheavals the Mississippi overflowed its banks, and the flood waters poured into the great depression left by the quakes. Other lakes were formed in eastern Arkansas and in northwestern Louisiana.

Duck's Back

Good weather for ducks, especially young ducks, is fair—not wet and rainy, as is commonly supposed. Poultry specialists of the department of agriculture say that domestic ducks like water underneath for swimming, but not rain from above. A heavy cold rain on a duckling's back may cause a fatal chill—regardless of the way water is said to run off that part of the bird. The reason is that the back feathers are the last to grow on a duckling. Nature provides a thick layer of down on the underside early in life, but the back is not safely feathered for protection from damp and cold until about the eighth week, when the duck is almost old enough to market "green." Though popular sayings about ducks are frequent in American speech, Americans are much less familiar with ducks than with chickens and turkeys.

A Woman's Hat

By ELEANOR PARKINSON
McClure, Newspaper Syndicate

After being married to Tot for fifteen years George Witherspoon had learned to expect just anything at breakfast. Still, he was a bit alarmed the morning Tot suddenly burst into tears. "What's wrong, honey?" he asked gently.

Tot gulped and stuttered, "I'm . . . unpoplar. And I've got to make that speech at the United Clubs Bond drive tonight. I represent the Woman's Club. Each speaker is up for ten minutes and there are ten minutes for buying bonds. I just know that no one will buy after I speak. Everyone will be for Jane Watson, representing the Mothers' Club. She has wonderful clothes and stage presence and personality."

"Nonsense!" George said. He knew Tot's faults but he knew that she was just as good and twice as patriotic as Jane Watson. As to her wardrobe, Tot really had something. The last shipment of her material was made on October 30, 1944, three months after the manufacture had been ordered by the War Production Board.

"It won't be a bit," Tot sobbed. But later she thought it over. Her

"So you've been saving for something."

hat was a wreck. It had been very nice—a little skullcap of sequins with a veil. But for some reason she had been conscious of its shabbiness. A new hat would give her a lift. Tot worked on her speech all day. Toward evening she dressed in her best looking suit and went downtown. Just before dinner time she found the hat. It was a tiny, flowered, foxtail thing—very bright and light as froth. It had a perky bit of a veil. To Tot it was magic. It made her feel young and gay, yet poised and self-confident. "I'll take it," she told the indifferent salesgirl. George's smile flashed proudly when he saw her. "Well, well! Peeling better!"

They went directly to the Bond drive and Tot hurried to the platform with the other speakers. "You look lovely," she told Jane Watson.

Jane may have spent the day in the beauty parlor and she was in a brand-new outfit from top to toe. So were Marge Wilson and Alice Lake. But no one had as pretty a hat as Tot's.

Alice spoke first. She sold fifteen thousand dollars' worth of bonds. Jane was next. She spoke. She was excellent. She addressed her remarks to "You great big handsome gentlemen." Her sales amounted to six thousand dollars.

"I can't understand it," Tot whispered to Alice.

"I can," Alice said. "The great big handsome gentlemen's wives didn't like Jane's approach."

Tot was next. She saw George's proud look. She remembered her hat and kept her chin up. Her speech was titled, "Do You Really Need It?"

"So you've been saving something," Tot finished. "Do you really need it? If not, go without it! The boys really do need the things you bond money will buy!"

The terrific applause amazed and frightened her a little. Forty thousand dollars were chalked up for her. She sat down flushed with happiness.

Marge spoke last. Her sales were low, possibly because almost everyone had bought all they could. Anyway, Tot was the winner. Then Tot saw Jane Watson coming toward her. Jane was smiling too, but her eyes were green. "Congratulations, Tot. You were so clever. Of course, dear, no one but you would think of making a bond speech in that hat. I kept wondering if it has any salvage value."

Tot's face flamed. She knew the hat was inexpensive. But Jane wasn't usually sarcastic. Well, it was a clear case of sour grapes! Tot opened her mouth to say so, glanced in a mirror—and was silent. "I suppose you went over big because everyone could see that you practiced what you preached."

Jane sat with a shrug. "Tot laughed. 'That was the general idea.' She glanced in the mirror again. Her face was radiant and she was wearing her old hat. Thank heaven for that indifferent salesgirl!"

Have You Paid-Up Your Subscription This Month?

If you haven't, your name will be dropped from the mailing list. The label on which your name is printed shows when your time expired. If the figures following your name read like this: "4 25 46" that means that your time will be out on April 25, 1946. The first figures indicate the month, the second figures indicate the day of the month, last figures the year.

The War Production Board, which controls the supply of newsprint paper, has instructed all papers to drop names from the mailing list promptly ON THE DAY OF EXPIRATION. We are trying to comply with these regulations in order to keep a supply of paper on hand. It is also a violation of Postal Regulations to continue mailing papers which have not been paid for in advance.

In the past we have gone to considerable expense in mailing notices to all subscribers by letter—first class mail. WE CANNOT CONTINUE THIS PRACTICE AND YOU WILL NOT RECEIVE ANY NOTICE IN THE FUTURE.

RENEW PROMPTLY

THIS ADVERTISEMENT AND NOTICES IN THE PAPER, WHICH APPEAR FREQUENTLY, SHOULD BE SUFFICIENT FOR ALL THOSE WHO WISH TO CONTINUE RECEIVING THE PAPER. IF YOUR PAPER DOES NOT COME, YOU MAY KNOW THAT THE TIME IS OUT.

PLEASE DO NOT ASK US TO CONTINUE THE PAPER OVER TIME—WE MUST COMPLY WITH WPB AND POSTAL REGULATIONS.

Subscription Rates

The following rates apply on ALL subscriptions new or renewal. Please take note.

\$1.50 per year

for all subscribers who live in Coffee County

\$2.00 per year

for all subscribers living outside Coffee County

Extra Copies of the Paper are 5c each

Electric pig brooders help to save one extra pig per litter and give an extra crop, especially in the colder sections. The brooder provides a warm hovel for the pigs when not nursing.

Efficient Cleaner
Keep the dusting of vacuum cleaner emptied after each use. It is vital in increasing the efficiency of the machine. Failure to do so destroys the force of suction which does the work!

One of the secrets of Mr. Jones' success in growing out the lespedeza is the liberal use of fertilizer.

CROTALARIA
Peanut following several years of crotalaria made ton to the acre without any commercial fertilizer on the farm of T. C. Bradshaw, near Elba. While this is an unusual yield following any ever crop, it is a good indication that crotalaria improves the soil, thereby increasing the crop yields. Why not give it a trial on some of that sandy land that is planted to corn almost every year?

DR. NORTON RESIGNS AS STATE SUPERINTENDENT; WILL GO TO WASHINGTON

Montgomery—Dr. E. B. Norton has resigned as State Superintendent of Education, effective June 15, to accept appointment as assistant U. S. Commissioner of Education, in Washington, D. C. Dr. Norton's term as State Superintendent of Education expires next January, and under the constitution he was not eligible for re-election. Gov. Sparks announced that he will appoint Dr. H. C. Pannell, of Tuscaloosa, for Norton's unexpired term. Dr. Pannell is an unopposed candidate for State Superintendent in the May primary, and after serving the unexpired term will begin a four-year term in January.

Dr. Norton, a native of Jefferson County and former Covington County School Superintendent, was highly commended by Gov. Sparks. "Whatever advances have been made in education by this administration, you are in a large measure responsible, and you planned to make this acknowledgment of the high quality of your service," Gov. Sparks wrote in accepting Dr. Norton's resignation.

ELBA SAILOR ABOARD USS MISSOURI MAKING VOYAGE TO ISTANBUL

Aboard the Battleship USS Missouri in the Gulf of Mexico (Delayed)—Leon Brooks, 28, baker, first class, Elba, Ala., is serving on the battleship. Brooks, who recently left Gibraltar with Admiral H. Kent Hewitt, U.S.N., on the USS Missouri, is serving on the USS Missouri, U.S.N. Naval Forces in Europe, aboard the vessel, which is making a tour of six Mediterranean ports, is carrying the ashes of the late Turkish Ambassador to the United States to Istanbul.

The Missouri was the battleship in which the Japanese signed the surrender document on Sept. 2, 1945, which ended the Second World War.

Miss Sybil Rowell, of Andalusia, spent the past week end in Elba with her parents, Mr. and Mrs. Lawrence Rowell.

Mr. and Mrs. H. W. Richburg, of Pensacola, Fla., were recent guests of Mr. and Mrs. Guy Folson.

Land Posted Signs 5 cents each at Clipper Office.

Meat Storage
Pork should be prepared for storage within 48 to 72 hours after dressing; lamb within one week, and beef within 10 to 12 days. With this beef should be stored in a cool, dry place, and it is desirable to hold them no more than five days. Meat should be prepared in meat-sized parcels and all surrounding bones should be removed. The meat should be wrapped in waxed paper. The packages should be wrapped and either stapled or tied. Each package should be labeled, showing the contents, date, and lotter number. As soon as wrapped, the meat should be frozen as quickly as possible, preferably being placed on racks to permit circulation of cold air. Storage temperatures should be zero or below, with as little variation as possible. Properly prepared, beef may be held in storage for as long as a year, and pork for three to six months, without any deterioration in quality.

Thawing Pipes
It is dangerous for homeowners or handymen to thaw frozen water pipes by the use of open flames such as torches made of paper or torches burning gasoline or other volatile liquids. Open flames directed against a frozen pipe may cause the pipe to burst. At the same time, there is always the danger that an escaping spark may set fire to combustible material. There are only two safe ways to thaw pipes. These are by the use of electricity or steam. Another method which, while safe, has the disadvantage of being slow is the wrapping of hot cloths around frozen pipes. Experienced plumbers invariably use electricity or steam. The best procedure on the part of a homeowner who has a frozen pipe is to immediately call a plumber who will take full responsibility for thawing the pipe without danger to the property either from fire or from bursting.

Short Mortgages, Real Estate Mortgages and Rent Notes at Clipper Office.

Smokey Says:
HUBBARD—FIRE PREVENTION—BEFORE YOU LEAVE YOUR CAMPFIRE IN ORDER TO GO TO BED, MAKE SURE IT IS OUT.

Wash Furniture Finish
Soll from handling or from smoke, dust or grease may accumulate gradually on furniture and dim the finish. Almost all finishes on wood may be safely washed with proper care is taken. In washing any furniture, use a very mild, neutral soap or a fine soap. Do not allow the furniture to become dripping wet. Use a soft sponge or chamois wrung out of warm, thick soap-suds, rub the surface until clean; then wipe dry with a dry cloth. The surface may then be buffed with a dry cloth. If the wood is thoroughly dry before wax is applied. Painted or enameled furniture also may be washed this way.

ELBA COLORED SCHOOLS COMMENCEMENT EXERCISES STARTED LAST WEEK

The Elba City High School for colored folk will have its final commencement exercises on Monday evening, April 22. The exercises will be held in the school auditorium. The exercises will be held in the school auditorium. The exercises will be held in the school auditorium.

As we cannot see each individual one, we take this method to thank our many friends in the Elba, Elba, Opp and the surrounding communities for every deed of kindness and liberal contributions to us in the loss of our barn, stock and food stuff by fire on April 18th. May God bless each and every one of you.

Mr. Clarence (Chet) Laughum has returned to his home in Centralia, Ill., after spending last week in the Woodland Grove community, guest of Miss Erna Lee Walker.

Mr. Paul Rowe Brown, and Mrs. Paul Rowe Brown, returned to Tuscaloosa this week after spending several days with her parents, Mr. and Mrs. M. C. Boutwell, and other relatives.

Smokey Says:
HUBBARD—FIRE PREVENTION—BEFORE YOU LEAVE YOUR CAMPFIRE IN ORDER TO GO TO BED, MAKE SURE IT IS OUT.

Wash Furniture Finish
Soll from handling or from smoke, dust or grease may accumulate gradually on furniture and dim the finish. Almost all finishes on wood may be safely washed with proper care is taken. In washing any furniture, use a very mild, neutral soap or a fine soap. Do not allow the furniture to become dripping wet. Use a soft sponge or chamois wrung out of warm, thick soap-suds, rub the surface until clean; then wipe dry with a dry cloth. The surface may then be buffed with a dry cloth. If the wood is thoroughly dry before wax is applied. Painted or enameled furniture also may be washed this way.

Meat Storage
Pork should be prepared for storage within 48 to 72 hours after dressing; lamb within one week, and beef within 10 to 12 days. With this beef should be stored in a cool, dry place, and it is desirable to hold them no more than five days. Meat should be prepared in meat-sized parcels and all surrounding bones should be removed. The meat should be wrapped in waxed paper. The packages should be wrapped and either stapled or tied. Each package should be labeled, showing the contents, date, and lotter number. As soon as wrapped, the meat should be frozen as quickly as possible, preferably being placed on racks to permit circulation of cold air. Storage temperatures should be zero or below, with as little variation as possible. Properly prepared, beef may be held in storage for as long as a year, and pork for three to six months, without any deterioration in quality.

Thawing Pipes
It is dangerous for homeowners or handymen to thaw frozen water pipes by the use of open flames such as torches made of paper or torches burning gasoline or other volatile liquids. Open flames directed against a frozen pipe may cause the pipe to burst. At the same time, there is always the danger that an escaping spark may set fire to combustible material. There are only two safe ways to thaw pipes. These are by the use of electricity or steam. Another method which, while safe, has the disadvantage of being slow is the wrapping of hot cloths around frozen pipes. Experienced plumbers invariably use electricity or steam. The best procedure on the part of a homeowner who has a frozen pipe is to immediately call a plumber who will take full responsibility for thawing the pipe without danger to the property either from fire or from bursting.

The Great Hotel

By JOYCE N. MARTIN

McClure Newspaper Syndicate

"VERY well," said the associate manager of the palatial seaside hotel at Cornudas. "We'll cancel Miss La Crosse's suite. Yes, yes. It shall be exactly as you say."

He turned to his secretary in annoyance. "That Hollywood!" he glared. "I give up. You never can tell what'll do next. Well—we don't get the La Crosse wedding party, after all. It seems the bride hasn't time for a honeymoon with her lieutenant commander. Has to report at the studio at 4 p. m. for rehearsals."

"And now the studio press agent has thought up still another of his publicity stunts. The La Crosse suite, since it was voided for in advance, must be given to the first enlisted man who asks for a room."

"In the opinion of your board of Trustees and the Rural Electrification Administration, this property division is the key to complete rural electrification in South Alabama," the Covington board of trustees wrote to F. M. Hill, Jr., president of the South Alabama Electric Co-op.

"Nearly 10,000 farmers and other rural residents are waiting for electricity," the board wrote to F. M. Hill, Jr., president of the South Alabama Electric Co-op.

"The officers selected to be members of the committee to select the property of the South Alabama Electric Co-op, are: Louise Archie, Roy Adams, Ray Blocker, Ethylene Crook, Louise Daniels, Buck Donaldson, Sara Nell Gaines, Rita Pay Galloway, Tom Griffin, Billie Grimes, Charles Jacobs, Billy Jones, Luvania Johnson, Louise Jones, Eula Mae Nalla, Maxine Rushing, Donald Taylor, Maxine Taylor, Evelyn Smathers, Wilford Thompson, Henry Ellis Weaver, Hoyt Williams.

E. C. Griffin, principal, will have charge of presentations.

Mr. A. G. Jones, who has been in Montgomery for the past several months has returned to Elba and has accepted a position with Windham Lumber Company. Mrs. Jones and their two daughters, Betty Jean and Barbara, expect to move to Elba within the next few weeks. Friends are glad to have this fine family return to Elba.

The South Alabama Electric Co-op, board wrote its 3,520 members that the proposed transfer of the property of the South Alabama Electric Co-op, to the Covington board of trustees, will enable the Co-op to improve the two lines of electric service to the Covington area, which will be a great benefit to the community.

The five co-ops, now are completing engineering studies of their proposed areas. They plan to take electricity to every farm and other rural residents who want electricity. The proposed division is held by the South Alabama Electric Co-op.

A two-thirds majority of all the Covington and the South Alabama Co-operative members must vote for the proposed division of property if it is to be effective. This is a regulation of the State Rural Electrification Act. A co-op may receive the property of the South Alabama Electric Co-op, but the vote of the directors, by two-thirds of the members must approve it.

Mail ballots will be sent members of the two co-ops that will be counted at special membership meetings. The ballots will be mailed to the members of the Covington co-op, for May 9, and in the case of the South Alabama co-op, for May 14. The Covington members will meet in the Covington court house at Andalusia, and the South Alabama Co-op members in the Pike County courthouse at Troy.
